Question 1

Question Type: MultipleChoice

A customer is running a three-node Nutanix cluster.

Which data optimization feature cannot be enabled in this scenario?

Options:

A- Post Compression

B- Map-reduce dedup

C- Erasure Coding

D- Inline Compression

Answer:

D

Question 2

Question Type: MultipleChoice

An administrator needs to expand a Nutanix cluster that is tagging the network traffic at the CVM and AHV level. However, the administrator doesn't remember the configured VLAN ID.

Which command can the administrator run to find the correct VLAN ID from the CVM?

Options:

A- ifconfig

B- manage-ovs

C- acli

D- ovs-vsctl

Answer:

D

Question 3

Question Type: MultipleChoice

An administrator notices that a VM is slow and unresponsive. The administrator wants to compare performance to other VMs on cluster.

Which chart type is best suited to display multiple VM performance metrics for diagnosis?

Options:

- A-** Dashboard Chart
- B-** Entity Chart
- C-** Analysis Chart
- D-** Metric Chart

Answer:

D

Question 4

Question Type: MultipleChoice

An organization runs several core business applications on a Nutanix cluster. System stability and support are critical for these applications, which has an annual maintenance window.

How can the administrator assure that these requirements are met?

Options:

- A-** Purchase Mission Critical support.
- B-** Purchase Ultimate licensing.
- C-** Adhere to the STS release cycle.
- D-** Adhere to the LTS release cycle.

Answer:

B

Question 5

Question Type: MultipleChoice

Which option allows administrators to specify groups of VMs and assign them to a destination for Disaster Recovery using Leap?

Options:

- A- Security Policies
- B- Protection Policies
- C- Recovery Plans
- D- Availability Zones

Answer:

D

Question 6

Question Type: MultipleChoice

Refer to the exhibit.

Update VM

?

×

TYPE	ADDRESS	PARAMETERS	
CD-ROM	ide.0	EMPTY=true; BIOS=ide	<div><div></div><div></div><div></div><div></div></div>
DISK	scsi.0	SIZE=4GiB; CONTAINER=def...	<div><div></div><div></div><div></div><div></div></div>

Boot Configuration

Legacy BIOS

Set Boot Priority

Default Boot Order (CD-ROM, Disk, Network)

UEFI ⓘ

Volume Groups

You haven't added any volume groups yet.

+ Add Volume Group

Save

A team member has built a CentOS VM image for use as a template. An administrator deploys a new VM using the CentOS image as the 05 drive. No other drives are presented to the VM.

Following the deployment, the administrator attempts to boot the VM, but is unsuccessful.

What could be causing this issue?

Options:

- A-** The VMS Boot Priority must reference disk first before CD-ROW
- B-** The VM's Disk (scsi.O) setting must be set to make this disk bootable
- C-** No Volume Groups have been created for the VM
- D-** The CentOS VM image was built with UEF:

Answer:

D

Question 7

Question Type: MultipleChoice

What should an administrator do after a Protection Domain is migrated?

Options:

- A- Register Virtual Machines
- B- Restore Virtual Machines
- C- Mount datastores on Hosts
- D- Power on Virtual Machines

Answer:

D

Question 8

Question Type: MultipleChoice

An administrator expanded the disk capacity on a Windows VM, but the VM operator saw no difference in free space. Which additional step must the administrator take?

Options:

- A- Reboot the Virtual Machine
- B- Convert to a dynamic disk

- C-** Expand the current partition
- D-** Reconnects to iSCSi target

Answer:

C

Question 9

Question Type: MultipleChoice

An administrator has planned a RAM upgrade on a 3-node Nutanix cluster. Which step should be performed first for a non-disruptive memory upgrade?

Options:

- A-** Stop one CVM at time
- B-** RunNCC
- C-** Power off one host at time
- D-** Live Migrate VMs

Answer:

B

Question 10

Question Type: MultipleChoice

Which statement best defines Replication Factor 2 (RF2)?

Options:

- A-** Data will be written locally, and a second copy then will be replicated to another cluster
- B-** Data will be written locally, and a second copy to another disk group
- C-** Data will be written locally, and a second copy goes to a remote site
- D-** Data will be written locally, and a second copy goes to another node in the same cluster

Answer:

D

Question 11

Question Type: MultipleChoice

Which Nutanix cluster component is responsible for triggering data movement events between SSD and HDD tiers?

Options:

- A- Genesis
- B- ILM
- C- Cassandra
- D- OpLog

Answer:

B

Question 12

Question Type: MultipleChoice

An administrator wants a VM to communicate with two separate VLANs. What steps should the administrator complete?

Options:

- A-** Add two NICs to the VM and configure one for each VLAN
- B-** Add a single NIC to the VM and configure it for both VLANs
- C-** Turn on IPAM for autoconfiguration of VLANs
- D-** Configure a Security Policy to assign VLANs to the VM

Answer:

A
